Glazing	N/A
Miscellaneous	MIDDAS bespoke rotating screens
Performance	N/A

Background

Unilever is a British-Dutch multinational consumer goods company. With more than 400 brands focused on health & wellbeing, its products include food, beverages, cleaning agents and personal care products. It is the world's third-largest consumer goods company and one of the oldest multinational companies with products available in around 190 countries.

Spiralis is a specialist in the design, planning and supply of coordinated interiors ranging from structural elements to furnishings and accessories. With the experience of professionals who have been active globally in the office space planning and office fit out industry and the clear objective of delivering the highest quality level at every stage of the process.

Brief

Long term specialist fit-out partner Spiralis, approached MIDDAS to develop a bespoke pivoting screen for their project at Unilever's UK headquarters in Leatherhead, Surrey. Sited in a training area, the screens were to house large digital display screens and back-lit writeable glass panels, with the facility to rotate the screens whilst hiding all cabling and support mechanisms.

Solution

Using our core engineering strengths, MIDDAS were able to quickly develop a robust, workable solution, taking the initial concept sketch to the finished product in less than 6 weeks.

"Thanks for helping us give the client what they wanted, it's great to know that you guys are there to make and engineer what we draw, it is much appreciated."

Raphael Amodio, Spiralis Europe Ltd
