

CHELSEA FC LONDON, UK

Project Overview

Project	Chelsea FC
Location	Stamford Bridge, London
Application	Demountable Fire Rated access corridor to Restricted Access Stand
Walls	M100 FR30:30
Ceilings	N/A
Doors	MIDDAS Flush Glazed FR30
Glazing	Flush Glazing FR30:30
Miscellaneous	Designed to be easily dismantled and reassembled with quick connection details.
Performance	To meet the required 30-minute fire performance and being fully demountable

Background

Chelsea FC is a professional football club, competing in the English Premier League. Founded in 1905, the club's home is Stamford Bridge in West London, one of the oldest football grounds in the country.

Brief

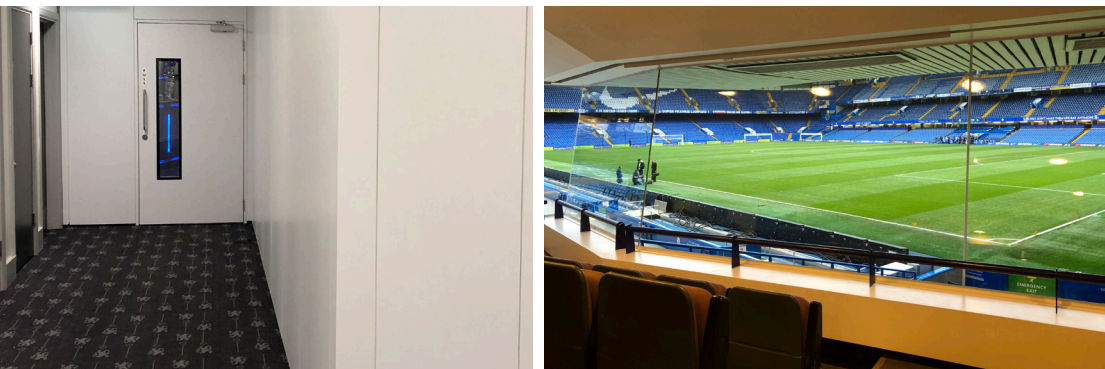

Chelsea FC required a fully demountable fire rated partition system and access doors that could be installed on match days to allow a safe access route to and from their Restricted Access Stand. The partition had to be fully removable for non-match days to allow use of the area for functions and corporate events.

Solution

The proven M100 Fire Rated wall system which has been independently tested as a complete system was selected for the project.

THE M100 is a fully modular system that was designed to fit the site constraints of the football ground and incorporated fire rated door sets and flush glazed vision panels.

Being of modular construction the MIDDAS M100 system could easily be removed and reinstated to meet the usage demands of the football club.

"Having struggled to find a fire rated solution to meet our brief, we were delighted when we identified MIDDAS and the solution they offered. The new fire rated partition looks like it has always been there and has met all our requirements."
